

Administrative Regulation

Fire Department, Cooperation with

The Fire Department is to contact the school principal prior to making routine inspections of the school. A custodian is to make the inspection tour of the school with the principal and fire inspector. Each principal and custodian should know where the main cut-off valves and switches are located for gas, electricity, and water. Principals are to check storage areas personally once each month.

Doors which open to main corridors must be unlocked when students are in the room. There should be no obstructions, such as desks, files, or tables within six (6) feet of the doors.
